Make checks payable to: Tuscarawas County Engineer

LIMITATIONS ON THE USE OF A SPECIAL HAULING PERMIT

1. The granting of a permit does not guarantee that the load described can be moved without damage to the pavement or structures; although the permit is granted on the assumption that the load can be moved without damage based on the best information available.
2. Permittee will be held liable for any damage caused by the movement. The county assumes no responsibility for damage to the permittee's equipment or load being moved due to any such failure. The permittee agrees to compensate the Tuscarawas County Engineer for any damage to a roadway or road structure and also to hold the County of Tuscarawas and the Tuscarawas County Engineer harmless from all claims, damages or proceedings of any kind and from all responsibility for personal injury or property damages (public or private) caused directly or indirectly as a result of the transportation of said vehicle(s) or object(s). Cash bond may be required to cover potential damages and expenses; bond will be returned minus any damage amount. Amount and applicability of cash bond will depend on the potential for damage, past history with the hauler, size of load, road use maintenance agreements, etc.
3. The applicant must file a certificate of his liability insurance, showing that he has procured adequate bond or insurance to cover the provisions of paragraph two. As a minimum, insurance shall be \$300,000 bodily injury and \$100,000 property damage.
4. The permit shall be in the possession of the driver at all times during the progress of transportation and will be shown on demand to any police officer, state highway patrolman, sheriff's deputy or employee of the state or county highway department.
5. The permission granted restricts the movement of the vehicle or object to the highways specified between the points designated, and within the time allotted.
6. Movements under a special hauling permit shall be made during daylight hours only and in such a manner to impede the least possible extent the normal highway traffic.
7. No vehicle or object being transported under special highway permit shall be left parked on the roadway either day or night except in case of an emergency, in which case adequate protection shall be provided for the traveling public. The vehicle shall not be loaded or unloaded within the limits of the highway.
8. The operator of the vehicle must comply with all laws, rules, or regulations covering the movement of traffic over highways and streets.
9. A permit is void at any time road, weather or traffic conditions make travel unsafe.
10. Reductions in legal weight posted on highways or bridges must be obeyed.
11. A permit will not be issued for built-up loads that are divisible into legal loads.
12. Oversize or overweight loads shall be operated or moved at such speeds and in such manner as to cause a minimum of interference with other traffic and minimum impact stresses on structures and pavements. No such movement is to exceed 40 miles per hour at any time, except upon that portion of a highway where the posted minimum speed is in excess of 40 miles per hour. The allowable maximum then becomes equivalent to the minimum posted speed.
13. Non-compliance with the general or special provisions of a permit, exceeding the weights or dimensions granted, or operating on dates or upon highways other than assigned shall render the permit null and void and the operator of the vehicle subject to arrest, as provided in Sections 5577.02 to 5577.05 inclusive of the Revised Code of Ohio.
14. If a State Route Permit is required for this move, please attach a copy with this application.
15. This application is for roads under the jurisdiction of the Tuscarawas County Engineer. Permittee is responsible for contacting any other entities with roads affected, ie: city, village, township.
